Austin, TX | 201-401-5903 | priya.dasari2014@gmail.com | linkedin.com/in/priya-dasari-9b58815

Director, Technical Program Management | Product & Analytics Leader | Digital, AI & Data Platforms

Seasoned Technical Program and Product, Analytics and Enterprise Delivery leader with 18+ years of experience leading global technology portfolios across AI-powered digital platforms, enterprise SaaS, digital commerce, cloud infrastructure, and data platforms. Proven ability to build scalable PMO frameworks, drive AI-enabled products & analytics delivery, improve delivery predictability, and align cross-functional execution with measurable business outcomes.

Expert in leading cross-functional teams across Product, Data Engineering, Analytics, and Business Intelligence to deliver scalable data ecosystems and actionable insights. Strong hands-on capability in MicroStrategy, SQL, Excel, Python, Power BI, and Tableau to validate data, drive analysis, and support product and program decisions.

LEADERSHIP IMPACT

Built enterprise data and analytics governance frameworks improving roadmap predictability by 30% and reducing cross-team escalations by 40%

Directed global technology portfolios up to 100+ million dollars spanning data platforms, AI/ML, digital commerce, analytics, marketing technology, and supply chain platforms

Led enterprise-wide data platform modernization (Hadoop → BigQuery) improving query performance by 35% and reducing infrastructure costs by $450K annually

Delivered SAP S/4HANA ERP transformation and CIAM platform supporting 5M+ global users

Enabled data-driven decision-making through unified customer data platforms and analytics solutions across digital and retail channels

---

CORE SKILLS

Program & Portfolio Leadership
Enterprise program delivery (including steering committee meetings, OKR reviews, and quarterly business reviews) & PMO governance • roadmap planning • stakeholder alignment • risk & dependency management • KPI framework • capacity planning • stakeholder communication

Product & Data Leadership
Product strategy for data platforms, customer data products, and AI-driven insights • KPI definition • experimentation • personalization • data-driven decision-making

Technical & Analytics Expertise
MicroStrategy • SQL • Data validation • Data modeling • Query optimization • Python • Excel • Power BI • Tableau • Data pipeline troubleshooting

Technology Platforms
Cloud: GCP, Azure, AWS
Data: BigQuery, Hadoop (Cloudera), enterprise data platforms
Enterprise Systems: SAP S/4HANA, SFCC, OMS, CIAM
BI Tools: MicroStrategy, Tableau, Power BI, SAS

PROFESSIONAL EXPERIENCE

TORY BURCH
Director, Technical Program Management Mar 2022 – Present

Lead enterprise transformation across data, analytics, AI, and digital commerce platforms supporting global retail operations.

- Directed delivery of enterprise platforms including AI-driven personalization, CRM, CIAM, ERP, and cloud data infrastructure, aligning execution with business and product strategy
- Defined KPI frameworks and built executive dashboards improving delivery transparency and roadmap predictability by 30%
- Led portfolio annual & quarterly roadmap planning(airtable) and enterprise delivery operations including steering committee meetings, OKR reviews, and quarterly business reviews, enabling executive decision-making and portfolio governance across strategic programs.
- Served as escalation point for cross-functional dependencies resolving delivery risks across engineering, product, and operations teams

ERP Modernization – SAP S/4HANA

- Led enterprise ERP transformation migrating legacy platforms to SAP S/4HANA supporting finance, merchandising, and supply chain operations
- Managed delivery across engineering, finance, and operations teams ensuring alignment on scope, milestones, and deployment timelines
- Implemented governance and dependency tracking frameworks for large scale ERP transformation
- Led Inventory Visibility and Omnichannel Fulfillment Initiatives
- Implemented integrations across ERP, order management, warehouse, and commerce systems enabling real-time inventory visibility and improved fulfillment routing across North America and Europe

Data Platform & Analytics Modernization

- Led migration from Hadoop (Cloudera) to BigQuery, optimizing data models and queries using SQL and supporting analytics use cases, resulting in 35% performance improvement

- Partnered with engineering and analytics teams to validate data pipelines, troubleshoot data issues, and ensure data quality for reporting and dashboards
- Enabled scalable analytics infrastructure reducing costs by $450K annually while improving speed and accessibility of insights

Customer Data Platform (OCP) & CRM

- Delivered Operational Customer Profile (OCP) consolidating data across POS, e-commerce, and marketing systems into a unified customer view
- Defined product requirements and KPIs enabling personalized marketing, segmentation, and improved customer engagement
- Supported analytics use cases by validating datasets and enabling BI reporting across business teams

Enterprise CIAM Platform

- Delivered enterprise identity platform supporting more than 5 million customer identities across global digital commerce channels

Digital Commerce Optimization & AI Search, Merchandising & Recommendation Engine (xGen)

- Led SEO and performance initiatives improving organic traffic visibility and digital conversion performance
- Led implementation and enhancement of xGen-powered search, merchandising, and recommendation engines improving product discovery and personalization across ecommerce platforms
- Delivered search relevance tuning, product ranking rules, and AI-driven recommendation capabilities based on customer behavior and merchandising strategies
- Coordinated integration of product catalog, inventory, and behavioral data pipelines enabling dynamic search indexing and personalized recommendations

ESTÉE LAUDER COMPANIES
Senior Technical Program Manager Jun 2019 – Feb 2022

- Managed 9M dollar global technology portfolio across 16 plus engineering teams and multiple regions including North America, APAC, LATAM, and EMEIA
- Implemented KPI based delivery governance and executive reporting frameworks improving visibility into program health and risk
- Led implementation of global customer data platform integrating more than 15 enterprise systems
- Delivered omnichannel capabilities including BOPIS and Click and Reserve improving digital engagement and store conversion

CITI
Senior Technical Program Manager Aug 2017 – May 2019

- Delivered Azure based digital wallet modernization supporting Best Buy Wallet and ExxonMobil Speedpass+

- Integrated authentication, loyalty, and fraud detection services improving transaction security and platform scalability
- Implemented delivery governance improving coordination across engineering and product teams

EY
IT Program Manager Oct 2016 – Jul 2017

- Managed 6.5M dollar cloud modernization portfolio migrating more than 1400 legacy applications
- Implemented PMO governance and financial tracking using Earned Value Management

GUCCI (Kering Group)
Senior Project Manager Jun 2008 – Sep 2016

- Led global ecommerce transformation and ERP integrations across more than 30 markets
- Migrated legacy commerce platforms to Hybris architecture enabling global scalability
- Implemented agile delivery frameworks and established offshore QA organization

EDUCATION
M.S. Information Technology (Data Analytics) - Southern New Hampshire University
B.S. Computer Science - Osmania University
